This Book is brought to you for free and open access by the The Classic at NWCommons. It has been accepted for inclusion in The Classic, 2000-2009 by an authorized administrator of NWCommons. For more information, please contact ggordon@nwciowa.edu.
The Toll of Katrina
Growing by Going—and by Staying

The note was on the door when I returned from lunch. “A group of students needs to see you as soon as possible. They are from one of our religion classes and seem quite agitated.”

You can imagine the thoughts that went through my mind. But before I had time to become too concerned, there they were bursting into the office, two young women explaining that more students wanted to come but had another class to attend.

It didn’t take long to learn that the students loved the class. Ironically, that was part of the problem. What they had been discussing that day had affected them, and they simply had to do something about it. As I listened to their comments, I identified with the issues that brought them to my office. What troubled the students had troubled me throughout my life.

The students’ class was on Christian mission. That morning they had been talking about the devastation of Hurricane Katrina and the appropriate Christian response. They had come to me to ask about the college’s response, but even more to explore the tension they felt as students reading books and discussing ideas when people all over the world were in great need right now!

“Doesn’t Christian compassion compel comfortable Christians to go and make a difference? College is wonderful, but not when people are dying for lack of help. Won’t I learn more by being where the action is?”

We had a good discussion. I have continued to think about their hearts and their minds since, as similar conversations have sprung up all over campus this fall.

I believe God does call people to leave what they are doing and go right now to meet a need. Remember the fishermen leaving their nets. We need to be genuinely open to that possibility when ‘Katras’ happen. And the truth is most of us aren’t. We are eager to find a good reason not to leave where we are and what we are doing.

But Jesus did not call all fishermen to leave their nets. The questions we all need to answer in the face of great immediate need are: Am I the right person to go, and is this the right time?

These are difficult, often complex questions. As we try to answer them, we can easily fall victim to rationalization, inappropriate guilt, immature zeal or the paralysis of analysis. So what do we do?

Several days after my meeting with the students from the religion class, another student stopped by. In the middle of a conversation on several topics she said, “I have thought about leaving campus this semester and going south to help, but I’ve decided I’m just not ready to make that decision. I am still learning about who I am and where God is calling me. But thinking about it has clarified why I am in college.”

Just days earlier, I had approved a request from one of our staff members to serve for a time as a counselor in New Orleans.

Some of us are called to go, and some of us are called to stay. But, I believe, all of us are called to keep learning and growing. Whichever decision we make, our task as faithful Christians remains what was penned in a 1970 statement on the purpose of a Northwestern education: “to think critically, to understand ourselves and our world, to analyze and synthesize, to make wise decisions, to evaluate, to appreciate, to empathize, to articulate and in general to become conscious of our own personal Christian interpretation of life—and thereby better serve God and humanity in the church and the world.”

As you continue to lift up in prayer victims of the hurricanes and recent earthquakes, please pray also for these two groups of servant learners within the Northwestern family: those called to go—now—and those called to stay—for now.
The Classic is published quarterly—in March, June, October and December—for alumni and friends of Northwestern College. So named because it served what was then known as the Northwestern Classical Academy, the Classic was the school’s first student newspaper, begun in 1891. It has been an alumni publication since 1930.

Send correspondence or address changes to the Classic, Northwestern College, 101 7th Street SW, Orange City, IA 51041-1996.

Winter 2005–06
NWC receives positive feedback from accreditation visit

Expect good news. That’s the feedback Northwestern received in November at the end of a comprehensive accreditation visit by evaluators from The Higher Learning Commission of the North Central Association of Colleges and Schools.

Although Northwestern won’t receive the commission’s formal report regarding reaccreditation until February, college officials were given very positive unofficial comments from the team. In a verbal preliminary report, the visitors listed nine strengths, including a strong sense of mission throughout all levels of the college and an “extraordinary” ability for people to articulate it, sound financial management, and strong facilities and technology.

The evaluators asked Northwestern to work on three areas over the next decade: strategic planning, retention planning and evaluation, and diversity in senior management.

Board affirms plans for learning commons

Northwestern took another step toward its next major building project at the October Board of Trustees meeting when trustees affirmed their desire to move forward with a $30 million capital campaign.

The campaign’s centerpiece will be a new learning commons, which will include a library and archives, computing services center, writing center, classrooms, auditorium, prayer room and coffee shop.

Architects have been working on the facility’s design development phase since April. The 74,000-square-foot facility has an estimated cost of $19.8 million. “There is enthusiastic support among board members for this project,” says President Bruce Murphy, “because they understand it’s critical to fulfilling Northwestern’s mission of integrating faith and learning. The building will be a link to both our heritage and our future, with the traditional aspects of the library connecting us to the roots of our past while the technology opens us up to the knowledge of the future.”

Alum honored during Christian Higher Education Month

Tony Wrice ’85 of Philadelphia is among 21 individuals who were honored during Christian Higher Education Month in October by the Council for Christian Colleges & Universities (CCCU). Wrice and the other honorees, all alumni of Christian colleges, are featured in profiles at the CCCU website, www.cccu.org/chem.

This year’s honorees included author and pastor Max Lucado, U.S. Rep. Roy Blunt of Missouri and Olympic decathlon silver medalist Bryan Clay. All were nominated by institutions in the 103-member CCCU.

Wrice directs Turn Around America (TAA), which helps crime prevention groups, law enforcement and neighborhood organizations across the country fight drug use in their communities.

Wrice, who majored in sociology and physical education and now serves as head track and cross country coach at Cheyney University, says his time at NWC was special. “I got the opportunity of a lifetime to see ‘the light’ come on in terms of how people view one another on a Christian level—people working together, respecting each other and wanting to see positive things happen in others’ lives.”
Admissions website ranked among nation’s best

Northwestern’s admissions website has been ranked among the best in the country by the National Research Center for College & University Admissions (NRCCUA).

The NRCCUA’s Enrollment Power Index gave Northwestern’s site an A grade based on functionality, design and information provided to potential students. Only 130 colleges received an A out of more than 3,000 involved in the study.

“This is a well-deserved honor and a credit to the people who put our new website together,” says Mark Bloemendaal, director of admissions.

Northwestern launched a new website, www.nwciowa.edu, in May. More than five times larger than the previous site, it includes student profiles for each academic department, numerous quotes from students and alumni, extensive information about academic programs, and front-page features that change frequently.

“The response we’ve gotten from prospective students and their parents is it’s a very good site,” says Bloemendaal. He adds that two-thirds of Northwestern’s applications for admission are now submitted online.

The NWC site was developed under the leadership of Dan Robinson, web development manager, and Anita Cirulis and Tamara Fynaardt, associate directors of public relations.

The NRCCUA study examined 28 criteria, which included webpage design and ease of navigation, online access to admissions materials, and ability to contact the admissions office.

Programming team wins at regional site

A team of two NWC students placed first among the 16 teams at the University of South Dakota site during the Association for Computing Machinery International Collegiate Programming Contest in November.

John Calbeek, a home-schooled high school student from Orange City who is taking classes at Northwestern, and Ben Kester, a freshman actuarial science and computer science major from Urbandale, Iowa, combined to solve three of the nine problems in the five-hour competition. They placed 3rd out of 182 teams among all the sites in the North Central region.

“John and Ben were fantastic,” says Michael Wallinga, instructor in computer science. “They definitely have the intelligence and ability to do well in a contest like this. I thought their age and inexperience might hold them back a little bit, but they were able to solve the problems and to code them in the necessary language without any errors. They solved all three of their problems on the first try, which was a key to their success.”

The competition requires teams of two or three students, huddled around a single computer, to collaborate to deduce the requirements, design test beds and build software systems that solve complex, real-life problems. The winning team is the one that solves the most problems in the fewest attempts within the least amount of time.
Karen Acker, art, exhibited her three-dimensional sculptures at Northwestern and at Dordt this fall.

Dr. Doug Anderson, history, contributed to Fluid Identities: Religion and Public Life in the Pacific Region, which was printed recently. The book is part of The Religion by Region Series, a project of the Leonard Greenberg Center for the Study of Religion in Public Life at Connecticut’s Trinity College.

Dr. Keith Anderson, spiritual formation, led a student retreat and a mentoring seminar for church leaders at Illinois’ Greenville College in September.

Dr. Paul Bartlett, kinesiology, presented a paper at the second international conference on Sport and Religion: An Inquiry Into Cultural Values, which was held at St. Olaf College in Northfield, Minn., in October. He presented “Two Sides of a Coin: Applying the Ethics of Play and Work Theologies to Organized Sport Participation.”

Dr. Ruth Daumer, nursing, presented “Healthy Heart Habits: Help for Teachers and Students” at a Des Moines conference for Lutheran Church Missouri Synod schoolteachers, administrators and clergy in October. She focused on recent research and biblical perspectives on physical, emotional and spiritual heart care for both students and teachers. Additionally, she served as a judge for the Sioux Valley Hospitals and Health System Quality Fair in Sioux Falls.

Dr. Laird Edman, psychology, presented a workshop entitled “Are They Ready Yet? Developmental Issues in Teaching Thinking” at the Society of Teaching Psychology conference in Atlanta this fall.

Jill Fischer, study abroad, spoke at the regional conference of NASFA: Association of International Educators in Des Moines in November. She and colleagues presented “A Broad View of the Field: Education Abroad in the Past, Present and Future.”

Dr. Michael Kensak, English, presented a paper at the Southeastern Medieval Association meeting, held at Stetson University in Florida. He spoke on “What’s the Matter With Chaucer: An Interdisciplinary Exploration of Form and Meaning.” Kensak also had an article, “Losing (and Finding) Your Place in Chaucer’s Book of the Duchess,” published in “Seyd in Forme and Reverence”: Chaucerian Essays in Memory of Emerson Brown Jr.

Piet Koene, Spanish, has been elected to a two-year term as vice president of the North American Christian Foreign Language Association. He will serve as program chair for the 2006 annual conference held in March.

Deb Menning, English, and students Chad Benson, Andrea Davis, Natalie Riek and Rachel Yackey offered a session at the Iowa Council of Teachers of English conference in Cedar Rapids in October. The presentation, “Beyond the Multigenre: Tales of Treasure Chests, Baseballs and Scrolls,” featured unique interpretations the students did for Menning’s Introduction to Literary Studies course.

An article by Dr. Carl Vandermeulen, English and communication studies, is included in a new book, Power and Identity in the Creative Writing Classroom: The Authority Project. His article is entitled “Double Binds and Stumbling Blocks in a Collaborative Poetry Writing Class.”

Anita Vogel, library, gave a presentation on Northwestern’s information literacy pilot project at the Information Literacy Forum on the campus of Des Moines Area Community College in June.

Neuroscience is new career concentration

Students interested in studying the brain—and the mind—can add a new, interdisciplinary career concentration to their program of study: neuroscience and persons (NAPs). Northwestern’s program is one of only a handful of such programs at undergraduate Christian colleges across the U.S.

NAPs, which includes courses in biology, chemistry, psychology, philosophy, computer science and religion, could be a specialization for majors in any of the natural or behavioral sciences. The curriculum was formulated by Dr. Ralph Davis, biology, a leading expert on roundworm neurobiology and a neuropharmacology researcher.
Model Mom
Widowed mom inspires twin daughters

by Emily Hennager ’06

As the mother of twins, Frances Meyer of Buffalo Center, Iowa, needed a sense of humor. Like the time five-year-old Tami spray-painted their old car. Instead of getting upset, Meyer laughed and encouraged Tami and Tyann’s creativity and imagination in other ways, like building forts and baking cookies.

Now that her daughters are 21, Meyer still finds ways to encourage them through notes in the mail, phone conversations, and by driving miles to watch their basketball games at Northwestern.

This constant support earned her Northwestern’s 2005 Parent of the Year Award. She was honored at a brunch during Fall Family Weekend in October.

“She’s my voice of reason,” Tyann says of her mother. “I tend to get overwhelmed with the details of life, but she says to take it one day at a time and do one thing at a time.”

Meyer works in food service at the local high school and also as a dietary aide in a nursing home. Her encouragement and service extends to her local community as well. She notices families in need and lends a helping hand by cooking, cleaning or opening her home to them. She also teaches Sunday school at her church and directs the children’s Christmas program.

In addition to the twins, Meyer is the mother of three sons: Rick, 35; Brent, 34; and Scott, 29. Brent and his wife, Leigh, have two sons, Garrett and Caden.

Though the Meyer house is filled with laughter, it has known sadness as well. When Tami and Tyann were freshmen at Northwestern in the spring of 2003, their father, Gary, was diagnosed

Frances Meyer, shown with daughters Tami (left) and Tyann, was honored as the 2005 Parent of the Year during Fall Family Weekend in October.
Frances Meyer

Parent of the year

with colon cancer and died two months later. Despite the pain of losing her husband, Meyer kept the family optimistic in the face of hardship and continually reminded them that God would see

them through.

“It was my faith in God that got me through,” she says, “and the support of my family and church family. I couldn’t do it without trusting in a God who cares for us and is in control of everything.”

In the months that followed, Tami and Tyann say their mother courageously adjusted to living alone, took on two jobs to help her daughters get through college, and reached out to support others who were hurting.

“Several of our high school friends have recently lost their dads, and my mom was there for them,” Tami says. “She knew how to comfort them, not just by what she said, but by being a friend.”

The twins agree that their mother is a role model of the kind of woman they want to be.

“She has a quiet strength and a strong, unwavering faith,” Tyann says. “I’d like to carry on her peace, her selfless spirit and her ability to be there for others.”

In addition to playing basketball at Northwestern, Tami and Tyann co-lead the team Bible study and are active in the Kinesiology Klub. Tyann also works as a science tutor and a Junior Scholar. Both exercise science majors, they plan to pursue graduate school next year.

Tami’s goal is personal training, and Tyann plans on studying physical therapy.

“I admire their faith and their work ethic,” Meyer says of her daughters. “I have lovely daughters. They are supportive, fun-loving, and have great personalities.”

Yet she always treats her daughters as individuals and remembers they need different kinds of encouragement.

“I tend to be too hard on myself,” Tyann says. “She tells me I don’t have to be perfect; I just have to do my best and what happens will happen.”

“I’m the opposite of her,” Tami says, pointing to her sister. “I’m not really a perfectionist. Mom says it’s OK, just to keep going and not give up. She’s my role model—my example.”

Legacy

Though Harriet (Korver ’52, ’54) and Arie Brouwer ’54 had different backgrounds, Northwestern was important to both. Six of Harriet’s siblings attended Northwestern, while Arie was the first from his family to graduate from high school and college.

Arie, who served for six years as general secretary of the Reformed Church in America and four years as general secretary of the National Council of Churches, always gave credit to NWC for his educational foundation. After he died, son Steve and his wife, Margaret, established the A.R. Brouwer Scholarship, awarded to a student who shares Arie’s commitment to Christian values and service.

“In this global economy, education is absolutely key,” says Steve. “It’s great to be in a position to help give students the tools they need for the 21st century.”

For information about establishing an endowed scholarship, contact Cornie Wassink, director of planned giving, 712-707-7109 or cwassink@nwciowa.edu.
by Amy Scheer

In the small village of Yeum, in southern Sudan, Jacob Duoth Khol '08 would waken with a sense of adventure. Bounding through his mud and thatch house, past the bountiful banana and mango trees, the inquisitive child would run off to hike, hunt or swim in the Nile when he wasn't caring for livestock on his father's farm.

It was a comfortable and contented life, he remembers, where nature provided all of his village's needs.

One day, a southern tribe invaded Yeum. They humiliated Khol's tribe, a proud, mostly Christian subset of the Nuer people. Among the most feared warriors in Sudan, Khol's people were unwilling to hand over their fruitful land and liveli-
“We are the type of people who would die to the last man before we run away. No one will enslave us.”

Sudan, the largest country in Africa, has been embroiled in civil war for 40 of the past 50 years. Though primarily a religious conflict between the north and south, the fighting also happens among the southern people over land and cultural differences.

It’s hard to say exactly when the invasion of Khol’s village took place, as Sudanese mark time by events and the moon rather than a calendar year. When Khol was about five years old, around the time that his twin brother died from an illness, the battles began; his father, an elder in the tribe, was wounded and died.

“We are the type of people who would die to the last man before we run away. No one will enslave us,” says Khol. “Family is the thing we value most. Respect, honor, dignity—once you lose that, once that cycle is interrupted, you have to kill all of us or we’ll kill you.”

When he was old enough to wonder, Khol asked his mother what happened to his father. She told him three differing accounts—one of which that he was stabbed through the heart—because she did not want her son to avenge his father’s death, as is traditional for his people to do.

Khol was kept away from most of the violence, though children his age would conduct a miniature battle of their own, flinging mud, corn husks and manure at each other in a serious attempt to earn the same respect their fathers were fighting for. The warfare he witnessed was “like seeing [the movie] Braveheart,” he says. At one point, he saw a spear fly through the air, take the shirt from his brother’s back, and fall with it to the ground.

Because Khol’s family lost the head of their household, they needed to pursue a new life. They left their land and livestock in the care of Khol’s uncle and went to the bordering country of Ethiopia, where they lived in several refugee settlements and Khol and his siblings attended school.

After several years, Khol’s sister, a teacher, received some forms to help find her a job in America. In 1998, when Khol was about 12 years old, he moved with his sister’s family to Tampa, Fla. Along with the move came culture shock. He plugged his airplane headphones into a wall outlet and received a significant jolt. He pressed the “Meat” button on his microwave and was angry and embarrassed that no meat appeared.

“I was afraid of the atmosphere I was in. I couldn’t understand anything at all,” says Khol, who at the time was fluent in two tribal languages but not English. “At school, I’d sit by myself. I was in shock; I didn’t know what to do.”

Later, the family moved to Omaha, where a high school friend suggested that Khol apply to Northwestern. The small community atmosphere appealed to Khol, and he’s been happy.

“I’m here for wisdom, knowledge, strategies, and I’m going to take them back.”

A double major in political science and religion, he mostly keeps to himself, though he and his roommate from Alton, Iowa, often pursue outdoor activities together. He rarely tells his stories of Sudan to others, though a “Life Journey” speech he gave in a class affected his classmates so profoundly they had to stop for a break.

Khol says it’s hard to be away from his country and his people. His mother still lives in Ethiopia with two of his brothers, a sister and no phone.

“It’s hard to hear on the news how people are dying in Sudan. I miss my mom every day. Every day I pray that God will continue to keep my mother alive and that I will see her again.”

Does he remember his father? “No.” Will he ever learn what happened to him? “I’ll find out. Once I talk to my mom, face to face as a man, she will tell me.” And what will he do then? “I don’t know.”

Meanwhile, he studies. Each day after a class, he spends an hour and a half reviewing what the professor said and planning a study schedule. He works diligently because he plans to return to Sudan someday.

“I’m gonna go back,” Khol says. “I’m here for wisdom, knowledge, strategies, and I’m going to take them back. I want to do something that will be very powerful for the whole country. Influence it so much that the impact will be great, and I will be remembered.”
Vonda Post’s whole life seems to have been leading to a teaching career. It just took her awhile to get on board with the idea.

Post was in high school when her mom suggested she’d make a great teacher. “I said, ‘Teacher—yuck! I don’t want to teach; that sounds horrible!’” Post recalls. “I couldn’t imagine standing in front of people every day.”

Meant to Be a Teacher

Vonda Post, formerly Northwestern’s comptroller, loves accounting. But she found she loves teaching even more. Her position on the business faculty allows her to combine both of those passions.

Vonda Post’s whole life seems to have been leading to a teaching career. It just took her awhile to get on board with the idea.

Post was in high school when her mom suggested she’d make a great teacher. “I said, ‘Teacher—yuck! I don’t want to teach; that sounds horrible!’” Post recalls. “I couldn’t imagine standing in front of people every day.”

“She doesn’t just teach us the mechanics; she teaches us how to use them and apply them.”

As a student at Northwestern, Post took a couple of education classes just to see what it was like, but again decided teaching wasn’t for her. Then, fresh out of college, she was asked to fill in as a temporary professor at Northwestern for a year, and she finally accepted her fate.
"I just loved it," she says. "Mom was right."

Now in her 14th year as a full-time faculty member in business and economics, Post could not be happier with the twist her career path took. "I love accounting, and I love working with college students," she says. "This has let me do both."

**Path to the classroom**

Aside from an accounting firm where she worked for a year in order to earn a certified public accountant (CPA) license (the standard terminal degree for an accountant), Post has had only one employer as an adult—NWC. She says the college has given her the chance to develop her skills as both an accountant and a teacher.

After graduating from Northwestern in 1988 with a double major in accounting and business economics, Post planned to wait until the following January, the start of tax season, to look for a job at a CPA firm. That's when the life-changing offer from Northwestern came along.

She soon fell in love with teaching, but without an advanced degree, she couldn't apply for the full-time position. So when a replacement was found, she focused on earning a master's degree from the University of South Dakota.

Wayne Kooiker, vice president for financial affairs at the time, offered her the job of comptroller at Northwestern. She accepted and considers herself fortunate to have had the opportunity to be mentored by Kooiker, "the greatest boss one could ever hope for," as she describes him.

The job confirmed that she really loves being an accountant. "It's just a fun job to me," she says. "I love to sit and do tax returns; I love to do audits."

**Thinking like an accountant**

There are many things Post loves about teaching at Northwestern: her colleagues, the Christian atmosphere, the integration of faith and learning. But by far her favorite part is working with students.

"It keeps me young, being around them," she says. "I especially love Northwestern students; they're hard workers, polite, considerate, respectful—just great people to be around."

When she first started teaching, Post says her goal was to cram as much into classes as possible. Now she's come to realize that it's better to give students a thorough understanding of accounting than to try to cover all of the material provided.

"I tell students my goal is to help them think like an accountant so I don't have to teach them absolutely everything," she says. "If I've done my job right, they should get to the point where they say, "This is how it should be done," because they've learned to think like an accountant."

Post constantly works to use creative teaching methods so her classes are more than just lecture, problem-solving, lecture, test, repeat. She gives students projects and writing assignments that are practical applications of concepts to help them learn the material better—an approach they appreciate.

"She doesn't just teach us the mechanics; she teaches us how to use them and apply them," says senior accounting major Anita Boone. "She'll teach us something, then say, "If you worked in this kind of situation, here's how you'd apply this.""

"A lot of the homework is questions from old CPA tests, so it's very practical, and she explains them so we understand them," adds senior accounting major Austin Nyhof.

Post values this feedback and the positive comments she often receives from students after they graduate.

"When I hear they think their education was good, or that their employer has compared them favorably with graduates of other colleges, that's the most important thing to me—to know they're where they need to be, education-wise, and they're representing Northwestern well," she says.

**Beyond the numbers**

Post has deep ties to both the area and the college: She grew up in Sanborn, just 30 miles from Orange City, and her husband, Steve '86, is also from the area and attended Northwestern, where the two met. Their oldest daughter, Jessi, is now a freshman at NWC.

They have three other children: Veronica (Ronni), a high school sophomore; Mitchell, a fourth-grader; and Mason, a first-grader. One of Post's favorite pastimes is going to her kids' activities.

Post also stays busy with gardening, lawn work, camping, swimming and sports. A volleyball and track athlete while at Northwestern, she still loves to play volleyball and softball, and plans to continue "for as long as I'm able," she says with a laugh.
A Monument to Learning

Northwestern’s planned learning commons will replace outdated, cramped library

by Tamara Fynaardt

With 24-hour Internet access available from nearly everywhere on today’s campuses, are the places we go to read and research even necessary?

They must be—because the majority of college and university libraries are experiencing more traffic now than in decades past. Studies have proven that if a library is underutilized, it has more to do with the building than the prevalence of the World Wide Web.

* * *

Harold Shill oversaw the planning and construction of a new library at Penn State Harrisburg in 1999. Shill, the university’s library director, noted a marked increase in library traffic the year it opened and every year since.

Intrigued that the library building remained such a popular destination—even in an age that seems increasingly dominated by electronic resources and remote access—he teamed with another university librarian to survey 180 institutions about their library building quality and usage.

Their report, cited in a Sept. 30, 2005, Chronicle of Higher Education article, lists a number of qualities and amenities that seem to ensure a library will be well-used: natural lighting, space for both quiet study and collaborative work, a pleasing aesthetic and ambiance, and ample computer and Internet access.

Based on the report, Shill also describes possible reasons for underutilization: “If a library is deserted, it’s not necessarily because the Internet has taken over. It’s more likely that the building itself is outdated, poorly lit, poorly planned.

Students say one of the top needs of the new learning commons is to provide more places for quiet, reflective study.
underfinanced and depressing—say a 1960s relic that is less attractive than another place to study.”

* * *

Northwestern College’s Ramaker Library is definitely not deserted. Just the opposite.

Ramaker Library was built in 1963 to accommodate a student body of 600 to 700. At the time, it was a vast improvement over the cramped quarters for the 25,000-volume collection on the second floor of Zwemer Hall. The new library was built to eventually hold a collection of 100,000 books and 400 periodicals, and administrators estimated the building could serve the college adequately for about 20 years.

Today, more than 42 years later, Ramaker Library serves twice as many students and holds 120,000 volumes. An additional 8,000 volumes, recordings and films are housed in the Learning Resource Center and the education department’s curriculum library. Ramaker has proven its functionality and adaptability.

But these days, it’s students who are doing the adapting as they contend with crowded stacks and study spaces and a shortage of computer ports.

A wireless network has circumvented the building’s technological limitations and given students more freedom in how and where they research and write. In addition, students creatively adjust available spaces to their modern study habits and need to work collaboratively. They routinely use the children’s library for group study and tutoring. And the Dutch Heritage Room has been equipped with technology that enables students to practice multimedia presentations.

During busy times, like before midterms and finals, many students simply study elsewhere.

Daniel Daily became Northwestern’s library director in 2003 after serving as a librarian at Duke University and Dartmouth College. He and Dr. John Brogan [formerly a religion professor, now the vice president for student development] spent last year leading a task force of faculty, staff and students to better understand how today’s students learn and then to design a building to support those varied learning styles.

Daily and his team recommended a building that will be more than a library. They envisioned a building...
that will represent, facilitate and be a home for learning in community. Called a learning commons, the multi-use facility will house the library and also include the college's technology center, classrooms, a writing center, a special collections archive, an auditorium, a coffee shop and a prayer chapel.

Daily says libraries today need to be quiet—and bustling with noise and activity. They need to provide access to a growing collection of books and journals—and the latest technology. Students expect traditional trappings like reference desks, shelves and study carrels—and modern conveniences like a coffee shop and casual areas for collaborative work.

"Today's libraries, including Ramaker, are friendlier," says Daily. "It's OK to talk; it's OK to have food in the library. Students need the freedom to work collaboratively with peers or with a reference librarian," he explains.

At the same time, students also want more quiet spaces to study alone. So the new library will include a quiet reading room, a necessity Daily says will feel like a luxury to students who've gone without such a space.

With over half of the 74,000-square-foot learning commons dedicated to the library, Daily hopes to boost the college's book collection to 200,000. He also wants to expand the archive's holdings and resources so that nearly 125 years worth of academy and college records can be stored and cared for in one place rather than in locations across campus. In addition, he hopes Northwestern's archives might become the place to study the history of northwest Iowa.

Wireless technology will continue to enhance both individual and group study and research. Students will find more laptops available for checkout and multimedia rooms that support PowerPoint and music and movie editing.

The new learning commons will also have a coffee shop to facilitate, as one faculty member on the task force described it, "both intentional and incidental learning"—the kind that happens through casual conversation with a professor, friend or mentor.

Daily, President Bruce Murphy and others on campus say a library should be a monument. Even with so much information accessible outside the walls of a library, it is still important as a place.

"Studies prove that as libraries are built or renovated, they get used more," says Daily, echoing Shill. "There's something symbolic about a library. As a place where we study and research, it should be grand and look a certain way."

Northwestern's new learning commons is slated to be built just west of Christ Chapel, another monument of sorts. The two will flank a new main entrance to the campus, welcoming students to a place where the pursuit of faith and learning is important—grand, even.
Of course

Seeing Through Other Eyes

Class:
ENG 225: Literature of the Developing World

Instructor:
Dr. Joel Westerholm, professor of English

A destitute Nigerian mother with seven surviving children. A poor fisherman on the Caribbean island of St. Lucia. A young woman in India learning from her father, a master musician.

Their stories—told through the writings of authors from those nations—are giving Northwestern students a glimpse into the hearts and minds of people different from themselves in a class entitled Literature of the Developing World.

Approximately half of the students enrolled are English majors. The others are taking it to fulfill their cross-cultural general education requirement.

“All literature studied is the attempt to see what it’s like to live the way someone else does,” says Professor Joel Westerholm. “Here the great challenge is that the people whose lives we’re trying to inhabit for a time are from India and Nigeria and the West Indies—so I think it probably takes students farther out of their experiences than just about any course we offer.”

At the time Westerholm developed the class, Northwestern offered courses focusing only on British and American literature. Students, however, were returning from taking the Graduate Record Examination and reporting the test covered literature from other parts of the world.

In response, Westerholm attended a summer institute sponsored by the National Endowment for the Humanities that focused on literature of the developing world. Upon his return, he proposed the course.

“I love reading the material,” he says. “India is probably the biggest hotbed of great fiction in the world right now, Caribbean poetry is gorgeous to listen to, and the Nigerians have a gift for laying feelings out raw. One of the great joys of teaching literature is you get to read books and talk about them.”

Equally as satisfying is the discovery that the course has succeeded in teaching students how members of other societies think, feel and act. While on a Spring Service Project trip to Honduras, Westerholm was working side by side with a student from his class. Looking around her, the student asked Westerholm if the children they were helping were the kind of people she had been reading about in the novels from India.

“Her ability to make that connection and to discuss with me the things the Honduran kids and the Indian peasants had in common—and the ways they were different—showed me students can learn a great deal from the reading experience,” Westerholm says.

Reading list:
From Nigeria:
*Anthills of the Savannah*, a novel by Chinua Achebe
*The Joys of Motherhood*, a novel by Buchi Emechta
*Death and the King’s Horseman*, a novel by Wole Soyinka

From the West Indies:
*A Small Place*, an essay by Jamaica Kincaid
*Omeros*, a poem by Derek Walcott

From India/Pakistan:
*A River Sutra*, a novel by Gita Mehta
*East/West*, a collection of short stories by Salman Rushdie

Assignments:
Students come to class with a one-paragraph response to a question posed by Westerholm about the reading they were assigned. The responses—which must include a quotation from the text—serve as the springboard for class discussion. There are also three exams and a 1,250-word critical essay involving research.

Books by authors from Nigeria, India, Pakistan and the West Indies comprise the reading material for Dr. Joel Westerholm’s Literature of the Developing World course.
Eye of the Hurricane

Articles by Tamara Fynaardt, Carrie (Odell ’01) Anderson, Anita Cirulis and Duane Beeson

When hurricanes Katrina and Rita brought devastation to the Gulf Coast, Northwestern alumni were among the millions affected. Other alumni have been part of the relief effort. Here are some of their stories; read more at www.nwciowa.edu/hurricanestories.
Displaced

Laura Ferguson travels the South ministering to members of her New Orleans church

“I hardly ever watch TV,” says Laura Ferguson ’98 of the initial forecasts about Katrina. “I’d heard it was out there, but it’s hurricane season, so there’s always something in the Gulf.”

Saturday morning, Aug. 27, Ferguson, a staff member with Urban Impact in New Orleans, learned from a church elder that the city might be evacuated. This one—Katrina—might be serious, she thought.

By noon Saturday, Ferguson had packed a bag with two T-shirts, a skirt and a pair of flip-flops. She figured she’d be gone a few days.

Throughout the afternoon, she helped call everyone in her church, urging them to come along. At midnight, 12 Urban Impact staffers left New Orleans with 75 people from Castle Rock Community Church.

Many others stayed behind. “They didn’t have transportation,” says Ferguson, citing estimates that over 25 percent of New Orleans’ residents live in poverty. “And it’s like small towns in northwest Iowa: Their family all lives around them. So even if they could leave—where to?”

Those who did leave went first to Mississippi and then on to Arkansas. In the days that followed, while the rest of the country was learning of the deplorable conditions in New Orleans’ Superdome and Convention Center, Ferguson was hearing about it too—from friends and church members who’d been there.

“There were National Guard in the city right after the storm,” says Ferguson. “They were rescuing people and taking them to the Convention Center—just dropping them off without any food, water or order inside.”

An older man from her church survived there, hungry, thirsty and going 10 days without the dialysis he usually needs three times a week.

Another friend and her children also spent the week at the Convention Center. “The kids saw things they shouldn’t have,” says Ferguson. “A woman got

continued on page 20

The Ripple Effect

Katrina transforms Marilyn Brinkhuis’ city

Helicopters constantly passing over rooftops. Sirens blaring day and night. The neighborhood in Baton Rouge, La., where Marilyn Brinkhuis ’50 lives felt more like a war zone than home during the weeks following Hurricane Katrina.

Brinkhuis, who resides near a women’s hospital where many of New Orleans’ premature babies were sent, remembers the stress people felt in the days after the hurricane struck.

“In the beginning, [New Orleans] hospitals weren’t evacuated, and no one was doing anything to help,” she says. “We could hear on battery radios—doctors and nurses were trying to call out. There was no electricity and they were stranded—nobody was going in to get them.”

She remembers the thrill people felt when word finally came that the charity hospitals were evacuated. But residents of Baton Rouge still deal with daily tension.

Overnight, the city swelled from 250,000 to 500,000 people. Grocery stores have filled up again, but with twice the cars, what once was a 10-minute drive now takes an hour. There are no hotel rooms available, and every house on the market sold—many sight unseen.

“It’s not the same, and it never will be the same,” Brinkhuis says. “All the bigger businesses from New Orleans will settle here. Traffic will be terrible because we’ve had to house so many people. Half of the people in Baton Rouge have been displaced. That’s why I say it’s a different place.”

In the face of overwhelming need, however, people in Baton Rouge banded together to help.

“Christians all pulled together, no matter who they were,” Brinkhuis says. “Everybody wanted to help where they could.”
Hurricane Rita was expected to hit 100 miles down the coast from Orange, Texas. Instead, the eye of the storm passed right over Mike DeKrey's community.

De Krey, a 1980 NWC alum, was awakened early Thursday, Sept. 22, by a phone call informing him of a forced evacuation. Just 36 miles from the Gulf of Mexico, Orange is only 16 to 20 feet above sea level. The storm surge was expected to reach 20 to 25 feet.

“We spent the morning getting the house ready,” DeKrey says, “cleaning out cabinets and moving items that were at floor level.”

By 6 p.m., the DeKreys' neighborhood was eerily quiet. “I bet we didn’t have five percent of the people in my subdivision left,” he says. “It was a ghost town.”

DeKrey and his wife, Linda (Wynja '81), left for Dallas. They expected to return the following Monday, and only packed enough clothes for a few days. But Rita hit Orange with 110 mph winds, closing the county for a week.

The family returned home on Thursday, Sept. 29. “It was the oddest thing driving back,” DeKrey says. “About 100 miles away, we were wondering, ‘Where’s the damage?’”

As they got closer, they didn’t need to wonder. There were so many trees by the road near their house that they weren’t able to park on the street.

“It was very unsettling to pass so many homes that had been hit,” says DeKrey. “The damage ranged from a few holes in the roof to the roofline split open by tree trunks.”

Though the DeKreys' house had little damage, 15 trees were down in their yard—huge 50- and 60-year-old pines. “Our neighborhood was the worst hit in the area.”

Now Orange is trying to “get back to normal,” which DeKrey says can sometimes be disconcerting. “Emotionally, everyone needs to get ‘back to the way things were,’ but everywhere there is evidence that it never will: wooded areas so thin you can see through them, landmark buildings which are gone or being removed, people who have not yet returned or who have left because their job is gone.”

Junior Kevin Sas helped to coordinate the collection of 789 teddy bears that were donated for distribution to children affected by Hurricane Katrina. For more information on the campus response to Katrina, visit www.nwciowa.edu/hurricanestories.
Rebuilding

Scott Wolfswinkel offers employment to New Orleans refugees

A former gang member, Leroy has nine kids; seven still live at home. After Hurricane Katrina struck and the levees broke, he carried them, one by one, on his shoulders to safety, walking through neck-high water as bodies floated by.

Leroy’s family evacuated to Gonzales, La., where they and others were later invited to Iowa by Leroy’s brother-in-law, who pastors a church in Des Moines.

Among the evacuees were Kevin, Anthony and Daniel, who also have families and harrowing survival stories. Now the four are building new lives—and employed at Wolf Construction, owned by Scott Wolfswinkel ’96.

“My father-in-law was helping them, so we met the families and each took a part in getting them settled,” explains Wolfswinkel. Although the men had little to no construction experience, they have proven fast learners and currently work at Wolf Construction’s wall component factory.

In mid-October, the men learned their former neighborhood in New Orleans is condemned and will be razed. Wolfswinkel donated a semi and drove with the men to salvage whatever they could of their former lives.

Before they left for New Orleans, Wolfswinkel filled the semi trailer with building materials, and churches and individuals contributed 14 refrigerators, food and water.

Working with FEMA and Urban Impact, Wolfswinkel is investigating the possibility of opening another wall component factory in New Orleans to mass-produce walls for rebuilding the city.

Even if Wolf Construction sends workers to New Orleans, at least three of the four men have said they won’t be among them. “Go back? Go back to what?” Anthony told the Des Moines Register. His new church recently married him and his girlfriend, the mother of his three children.

“We’re starting over,” he said, “and we’re going to start all the way over.”

Every Day an Emergency

Paramedic Tamara Buffington provides disaster relief in Biloxi

A certified Federal Disaster Team member from Johnson County, Iowa, paramedic Tamara (Yoder ’97) Buffington was called to Biloxi, Miss., in the wake of Hurricane Katrina. Biloxi was closer to the eye of the storm than New Orleans and sustained more immediate wind and water damage.

This was Buffington’s first call since joining the Iowa-1 DMAT (Disaster Medical Assistance Team) a year ago. She says it overwhelmed her expectations.

“It wasn’t necessarily the catastrophic injuries I’m used to seeing,” she says, “but it was all day, every day. We arrived a week after the storm, and the stench was disturbing, to say the least. Houses surrounding the hospital still hadn’t been cleared of bodies.

“A phrase repeated a lot was ‘destruction of biblical proportions,’ and we were completely immersed in it. The turmoil never stopped.”

Working in tents without air-conditioning, Buffington helped see 200 to 300 patients a day who needed everything from tetanus shots to wound care to psychiatric intervention.

Despite the hurricane, a Biloxi resident’s sense of humor was still intact. This sign was posted in front of the Beauvoir House, a well-known historic home.

An older man had been living under his overturned shrimp boat and needed food and clean water to drink and bathe in. A nurse from a Biloxi hospital had been forced to stay and help while Katrina raged. She returned home to find her house destroyed and her husband and son dead.

“She wandered over to us and said she wanted to help,” remembers Buffington, “but she was on the verge of a breakdown.”

The Biloxi residents Buffington met were grateful and gracious as they tearfully told story after story of loss and devastation. More than once she was invited to come back when the city is proud and beautiful again.

“This is embarrassing,” one resident told her. “It doesn’t normally look this way.”
Fall sports

Junior Keith Sietstra’s 1,286 yards rushing this season brought him to second place in the school record book with 3,261 career yards.

Football
- Ranked 17th nationally.
- Finished 8-3 overall and placed third in the Great Plains Athletic Conference (GPAC) with a 7-3 record.
- Five athletes earned GPAC player of the week honors: Craig Hector (offense), Ben Jackson (special teams), Nathan Jansen (defense), Austin Janssen (defense) and Keith Sietstra (offense).
- Janssen, Phil Kooistra, Jordan Van Otterloo and Travis Wallin earned first team GPAC honors, while Jansen and Sietstra made the second team.

Men’s soccer
- Compiled a 6-10-1 overall record, 5-5-1 in the GPAC for eighth place.
- Blake Wieking earned second team all-GPAC honors.

Women’s soccer
- Finished with a 10-9-2 record and placed sixth in the conference with a 6-3-2 mark.
- Qualified for the conference tournament for the first time, winning the first-round game against Concordia before losing in two overtimes to top-seeded Dordt.
- Sara Nessa was the GPAC player of the year, while Carrie Vander Horst and Morgan Walker were second team selections.
- Nessa was named the GPAC and region player of the week twice and broke Northwestern’s single-game points record (12).
- Walker earned league defensive player of the week honors.

Men’s cross country
- Placed eighth at the GPAC championships.

Women’s cross country
- Placed 10th at the GPAC championships.

Men’s golf
- Placed first at three meets.

Women’s golf
- Qualified for regionals by placing fourth at the GPAC tournament.
- Melissa Hisel finished tied for runner-up at the Waldorf meet.
- Coach Harold Hoftyzer was named the GPAC coach of the year.
- Hisel was an all-conference selection.

Volleyball
- Finished 24-11 overall and placed fifth in the conference with an 11-5 mark.
- Alison Waggie was named the GPAC setter of the week twice and earned regional honors once.
- Megan Rich was named the GPAC and region libero of the week twice.
- Katie Schnoes and Megan Meyer earned first team all-conference honors. Waggie was named to the second team.

Football team to serve in Europe next spring

Northwestern’s football team will travel to northern Italy, Switzerland and Austria for a 12-day mission trip during the last half of May.

Head Coach Orv Otten led Raider teams to the Czech Republic in 2000 and 2003 through Christian Outreach International. This time, the NWC squad will serve under the auspices of Zag Sports.

“Our goal is to give of ourselves to help missionaries spread the gospel of Jesus Christ, to provide multicultural experiences to our athletes, and for our players to get to know one another and our coaches at a more in-depth level,” says Otten.

The Raiders will compete against at least two of the newer club teams in Italy. After each contest, the players and coaches will share their testimony with those in attendance.

In addition, the team will minister to children and community residents through Italy for Christ. The student-athletes also hope to do work projects in the communities they visit.

Otten estimates it will cost each player about $2,000 to participate. The team is delivering firewood to raise money for the trip and is willing to do other work projects. Please contact Otten at 712-707-7283 or otten@nwciowa.edu for more information or to donate.
Face value

Barb Lubbers

Campus ministry assistant, college and community volunteer

Describe yourself in three words.
Hospitable, positive, organizer.

What is the most important part of your job?
Hospitality—creating a warm, welcoming environment for whoever calls or comes through the door. I see my job as a ministry to the students and staff I work with.

What do you dream of doing?
Traveling with a purpose. My husband and I would like to do short-term missions, visit friends in Africa and Asia, and help wherever the Lord would open doors for us.

What do you value?
Hearing and studying the word of God. Family and motherhood. Friendships with international students and their families. Relationships. The beauty and diversity of different people, places and cultures.

Who makes you laugh?
Everyone, especially my husband, Paul—he’s quite a story-teller. I love to sit around the table after a meal and share good conversation and stories with family and friends.

Why this job at this college?
It’s a perfect fit for me. I love young people and ministry, and I have a chance to use my administrative gifts. It’s a place I knew I would love to work—I share Northwestern’s mission.

What is your unique perspective on Northwestern?
I was born and raised in Orange City and received my degree here [in 1970]. I was a parent to a student here, and have been an employee in campus ministry for 13 years. I have seen Northwestern’s dedication to academics and spiritual formation deepen, including the growth of mission opportunities like Summer of Service and Spring Service Projects.

Is there anything else you’ve done at Northwestern that you’ve really enjoyed?
Getting to know international students. We were host parents for 15 years, and I was host family coordinator for five. I’ve also enjoyed organizing the annual Women’s Auxiliary Hostess Supper.

Describe Northwestern in three words.
Prayerfully equipping disciples. Prayer is increasingly a focus of our institution. Northwestern is equipping young Christians for lifelong learning, for their professions and life in Christ.

What is something you would change about Northwestern?
The busyness, the hurried pace of educational life. I wholly support Dr. Murphy’s desire to seek more peace and reflection in Christian higher education.

I’d just like to say …
There’s a hurting and dying world around us; don’t live life for yourself. Live your life to make a difference for Christ and for others as the Holy Spirit empowers you to serve.
Members of the class of 2000 chat before their pizza supper.

Willing to Take a Risk

by Duane Beeson

For Steve Macchia ’78, understanding God’s call has come through the influence of treasured friends, a good self-awareness, and a willingness to take a risk and trust the Lord. Now as a nationally recognized speaker and church consultant, he seeks to help other ministry leaders do the same.

* * *

Coming to Northwestern College didn’t seem to make much sense. Macchia was born and raised near Boston, there were hundreds of colleges to choose from in New England, and he’d never been to Iowa.

But the man who led him to Christ when Macchia was a high school junior was a Northwestern alum. Rich Plass ’71, his youth pastor, recommended NWC—and that was enough.

“It was all because I trusted my friend Rich,” Macchia says. “It was a wonderful decision.” Arriving in Orange City feeling like he’d entered Mayberry RFD, Macchia soon felt at home.

“They were four of the best years of my life. The Christian community was all around me—I took advantage of every opportunity to grow.”
Macchia started as a business major, but accounting didn't click for him. He switched to education and added Christian education through the influence of professor Rolie Simmelink. He worked with the youth group at a local church and in summer ministries at Cran-Hill Ranch in Michigan and Grace Chapel in Lexington, Mass.

As a student teacher, Macchia realized he was more interested in who his students were than he was in their academic work. After a conversation with a pastor at Grace Chapel, God's call became crystal clear.

He said, 'When you come to seminary, would you consider taking over our junior high youth ministry?' I said, 'What do you mean, when I come to seminary? I'm going to be a teacher.' But a light dawned on me: I realized I cared more about spirituality, family and community.

Macchia did enroll in seminary—Gordon-Conwell Theological Seminary—and worked with junior high youth at Grace Chapel.

Macchia was on Grace's pastoral staff for 11 years in a variety of capacities.

'I look back on that as my foundational ministry years,' he says. 'Anything we touched was growing. And I was too—I grew like a weed in my spiritual development.'

During that time, Macchia served on a committee for The Evangelistic Association of New England. One day, the organization’s board chairman took him out for lunch and told him the president was going to retire.

'He thought I was the man [for the job], 'Are you crazy?' I asked.

'[Wife Ruth (Broek '80)] and I were praying that God would close the door. The more we prayed that God would close the door, the wider it opened.'

"We desire to build a generation of leaders who lead from the inside out. We're calling people back to what spiritual leadership is all about."

Thinking the job would involve too much travel and was more than he could handle, Macchia said he would only preach at area church services once a month because of family commitments.

'I thought that would be the reason they wouldn't choose us, but it became why they said yes,' Macchia recalls. "Everything we did to try to control the process, God turned around. It became so obvious we needed to do this."

Encountering some challenges at the beginning, the association later experienced God's blessings under Macchia's leadership. Changing its name to Vision New England (VNE), the organization attracted as many as 12,000 to its annual ministry conference. VNE tripled its staff to a total of 70, added 20 new ministries, and served 6,000 churches from 80 denominations.

"Our biggest accomplishment was building a multi-ethnic, multi-denominational movement. We brought together people who had never spoken to each other, let alone worshipped together," says Macchia.

"He has had a major impact in New England," former mentor Plass says of Macchia. "He's very responsible for elevating in a positive way the awareness of the evangelical community, helping them recognize their strength, and serving as an ambassador ecumenically."

Working with teams is one of Macchia’s major focuses today. Since 2003, when he founded Leadership Transformations Inc., Macchia has sought to help meet the spiritual formation needs of leaders and the spiritual discernment processes of ministry leadership teams.

His role includes directing the Pierce Center for Disciple Building at Gordon-Conwell and teaching in the seminary’s Doctor of Ministry program.

"We desire to build a generation of leaders who lead from the inside out," says Macchia. "We're calling people back to what spiritual leadership is all about. Instead of board meetings that start with the perfunctory devotions and prayer, we encourage teams to work toward spending the majority of their time coming alongside each other in spiritual formation, out of which they will make decisions and do ministry."

"He has a genuine desire to see people living and ministering out of a deep and vital relationship with Christ," says longtime friend Paul Borthwick, author of How to Be a World-Class Christian. "He does a good job of bringing people back to the basics, helping them see that their life flows from that relationship."

And those who watch Macchia see something else.

"His willingness to trust the Spirit’s guiding has allowed him to do some things others might think would be less than cautious," says Kevin Parke, a member of Leadership Transformations’ board. "He’s more of a risk taker."
by Anita Cirulis

In 1972, Steve King was fresh out of college, but that didn’t stop him from taking on the daunting task of starting a work activity program for people with disabilities in Le Mars, Iowa. Told of the job opening on a Sunday afternoon, he applied Monday morning and was hired Monday night.

“The Lord was with me. The pieces of the puzzle just fell into place,” King says. “I had the help of a lot of people—including a great board of directors—and the community got behind it. I was the janitor, bus driver, accountant and counselor. It took a lot of energy, but it was a fun experience.”

From those humble beginnings, the Northwestern graduate has led nonprofit agencies serving people with disabilities for more than 30 years. In September he received his alma mater’s Distinguished Service to Humankind Award, presented by the Alumni Association during Homecoming.

A native of Orange City, King credits his years as a stu-
Steve King

Alumni profile

Steve King, a graduate of Northwestern, found his calling in rehabilitation. He spent seven years with the Plymouth County Work Activity Center in Remsen, Iowa, helping the developmentally disabled. In 1980, he moved to Tucson, Arizona, where he became president of Tetra Corporation. When Tetra merged with Beacon Foundation in 2003, King became president and CEO of Beacon Group SW Inc., a nonprofit agency that serves 600 clients, employs 130 people, and operates with an annual budget of $7 million.

“Due to Steve and his leadership over the last 25 years, this organization has found jobs for thousands of people with disabilities in metropolitan Tucson,” says Chuck Tiller, Beacon’s vice president of operations.

Helping physically and mentally challenged people find employment and independence is King’s passion. “Every day I look forward to going to work,” he says. “I wake up ready for a new challenge. It’s satisfying to see the change in people when they have the opportunity to grow and become more independent and successful.”

In 1981, King earned a master’s degree in rehabilitation administration from the University of San Francisco. King has served as chair of the Governor’s State Rehabilitation Advisory Council, co-chair of the Arizona Community Rehabilitation Providers Advisory Committee, and president of the National Rehabilitation Administration Association. In 2001, he received the association’s Guy F. Hubbard Award for Excellence in Rehabilitation Management.

Skip Whitley of Tucson, chairman of the Beacon Group board, describes King as extremely competent with a huge heart. “Not only the quantity but the quality of the service we’re able to provide, we never would have been able to accomplish without Steve’s leadership,” Whitley says. “He has been the driving force in growing opportunities for us to serve clients and then in providing really top-notch experiences for them.”

In 18 years, he’ll be ready for college.
Will you?

Little Raider Paul Swartz is the son of Betsie (De Boom ’00) and Scott Swartz ’99.

In 18 years, he’ll be ready for college.

Right now the No. 1 thing on his mind is eating … or being held. But time will fly, and it won’t be too long until he’s thinking about college.

When that time comes, imagine the relief you’ll feel if you’ve built up his college finances through a prepaid tuition program. The Independent 529 Plan, sponsored by Northwestern and over 240 private colleges, lets you lock in tomorrow’s tuition at less than today’s price.

Visit www.independent529plan.org or call 888-718-7878 to learn more.
by Amy Scheer

Gabe Franken remembers something his dad told him when he was little.

“Speak very quietly around the house. You, too, Jaymi. For the next week.”

The kids did as they were told. Their mother, Nancy, strained to understand them, sure that her hearing was going. In fact, that had been a recent fear of hers, one her husband thought was a little irrational.

A week later, Dad’s instructions changed: Speak loudly. By the first meal together, Nancy got the joke—and the lesson. That’s how Jim Franken ’75 taught: with wisdom, and with a sparkle in his eye.

During Homecoming festivities this fall, Franken was posthumously awarded the Distinguished Service to Northwestern College Award for his lifelong dedication to the college’s mission.

“He loved Northwestern,” says Nancy. “He loved that the college isn’t just affiliated with a church but that the focus is on believing in Christ and living in him.”

Franken served on the Board of Trustees and as president of the Alumni Association. As chairman and CEO of Interstates Companies and Harbor Group in Sioux Center, he established the Interstates Electric & Engineering Scholarship, which is available to Northwestern students pursuing related fields.

He had a passion for helping others discover their talents, Nancy says. “He found a lot of joy in that.”

A leader

“When he died, one of the things I was most upset about was that all that wisdom had been stricken in one moment,” says Gabe, who graduated from NWC in 2004. “What got me through that was realizing it was a BIG MAN IS ONE WHO MAKES US FEEL BIGGER WHEN WE ARE WITH HIM.”

John C. Maxwell

Jim Franken ’75 posthumously received the Alumni Association’s Distinguished Service to Northwestern College Award at Homecoming in October.

Wisdom Remembered
Jim Franken died of heart failure the morning of Nov. 13, 2001, at the age of 48. The outpouring of grief extended beyond family lines: Long tributes were produced by Interstates and by Associated Builders and Contractors Inc., a national organization in which Franken held many leadership roles.

The tributes are filled with stories of Franken—the little note he sent, the thoughtful questions, his laughter. They speak of the wise and charismatic leadership that Franken exuded and that he cultivated by actively seeking the best for his company.

A few months before his death, Franken approached Max De Pree, author of the best-selling books *Leadership is an Art* and *Leadership Jazz*, and asked if De Pree would mentor him. The two met just a handful of times, enough to impress upon De Pree the strong character and integrity of his mentoree.

“…Wisdom is sweet to your soul; If you find it, there is a future hope for you …”

Proverbs 24:14 (NIV)
Class notes

As I drive home under the Christmas lights strung over Central Avenue or listen to holiday music playing across campus from the Zwemer tower, I'm reminded again how awesome God is in creating each new season that we enjoy.

It's true, not everything about the holiday season is great—like last-minute, frantic shopping and the temptations of fudge and peanut brittle—but like life, they come with the season.

As I get older, I'm seeing the different seasons in people around me. I was reminded of that during Homecoming and at the class reunions this year.

Many of the younger alumni pushed strollers, held kids' hands or chased them from one Morning on the Green carnival activity to another. Middle-aged alumni talked about where their kids had located, what their occupations were and if their children were married. Older alumni talked about grandkids, or traveling and enjoying some free time. It's exciting to see so many different years represented by so many alumni all having one thing in common: Northwestern.

Every season is unique and includes both beauty and frustrations. Every new year should be a season of growth, whether spiritually, mentally or emotionally. This fall's reunion classes brought in memories and laughter about the fun times at NWC, as well as recollections of the disappointments (that at times proved to be areas of personal growth when they looked back).

Whatever season our alumni are in, it's always exciting to hear or read about it in the reunion booklets. There are many stories about where God has taken them in life and how they are being used in so many unique ways all over the country and world.

I wish I could remember all the names and faces I've met over the last four years of working here, but I can't (I'm in that memory-failure season), and that's OK because the common theme remains the same. People were impacted during their time at Northwestern, whether in '65, '80, '95, 2000—or any class year! The hard part for me is that many alumni seem to look younger and younger, and the years seem to fly by faster and faster!

Meeting people who are excited about Northwestern and are willing to share their stories, getting updates on the Web from alumni who keep us informed about where God has placed them or how God is using them, and having people come back to reconnect with the college and friends at Homecoming always bless me as I work here. Thanks for staying in touch with NWC and being excited alumni, whatever season you are in!

Deaths

Bernard DeCook '33, '34, age 89, died Aug. 10 in Lakewood, Colo. He spent 27 years as an FBI agent, based mostly in Denver. After retiring from the FBI in 1968, he worked for the Colorado Milk Marketing Board, served as a private investigative accountant and became part owner of Plastec Products and Tooltec Mold Corp. He is survived by three sons.

Jeanette (Rylaarsdam '37, '39) Baas died Sept. 24 in Grand Rapids, Mich. After graduating from Northwestern, she earned a bachelor's degree at Hope College and served as a lieutenant in the U.S. Navy WAVES. An English teacher for 15 years, she received a master's degree from Michigan State University. She was an active member of Central Reformed Church. Her survivors include her husband, Jack, and four children.

Artella (Mouw '41, '43) Bosch, age 81, died Sept. 28 in Sioux Center. She taught elementary school for several years, and she and her husband, Gerald '43, owned and operated Bosch's Clothing Store for 25 years in Sioux Center. She was an active member of First Reformed Church, where she taught Sunday school and catechism and was involved in women's ministries. Among her survivors are two daughters, including Denise Vander Stelt '75, a sister, Marlys Pennings '44, '46, and a brother, Cliff '47, '49.

Lois Maxine “Max” (Vande Waa '30) Freerks, age 75, died Aug. 14 in Omaha. She taught kindergarten and first grade for over 30 years. Maxine and her husband, Bob, were avid ballroom dancers and also enjoyed traveling. Her survivors include her husband and two daughters.

Class notes

'62

Allan Schimmel has been named to the board of visitors of Air University, headquartered at Maxwell Air Force Base, Montgomery, Ala. Air University is the Air Force’s center for professional military education.

'64

Roger Wyngarden’s wife, Leona, died Sept. 1 after a rapid onset of pneumonia and a long battle with ovarian cancer.

'65

Mary (Chittenden) Trimble, Apopka, Fla., manages a group of home-based travel agents.

John Wurpts, Ogden, Iowa, is a chapter president of the Christian Motorcyclist Association. He also serves on the board of directors for Walk to Emmaus, a spiritual renewal program that seeks to strengthen local churches.

'69

Dr. Jim Vander Velden received the Outstanding Adjunct Faculty Award for the 2004–05 school year from Northwest Iowa Community College. He teaches both on-campus and online courses in sociology, world religions and ethics. Jim and his wife, Gracia (Wynia), live in Rock Valley, where Jim is the city’s development director.

'71

The Rev. Everett Bosch is the associate pastor at First Presbyterian Church in Great Falls, Mont., after serving as a hospital chaplain for 23 years.

'76

Craig Hanenburg, Chicago, was recently named chief information officer for Smith Senior Living, a nonprofit senior living organization. He is responsible for the leadership and strategic planning of current and future technological needs.

Daryl Hoogeveen and his family recently moved to Kalamazoo, Mich. He previously served as the director of career services at Hamilton College in Lincoln, Neb., for seven years. He also coached several premier summer softball teams.

‘77
Randy Oostra, Toledo, Ohio, received his doctoral degree from the Weatherhead School of Management at Case Western Reserve University. He is president and chief strategic officer of ProMedica Health System’s Michigan hospital division. He and his wife, Barb (Vander Maten ’76), have three sons.

Mary Ann (Anker) Pals, a professional artist and art teacher (www.maryannpals.com), had a piece of her artwork accepted into the Chicago Art Open, a prestigious art exhibit in downtown Chicago. The exhibit ran Oct. 10–24 at the Third Floor Gallery.

‘79
Kevin Muur, Clinton, Iowa, remains active in RiverChor, a choral group. He is also a soloist and choir member in his church. In addition, he serves on the board of Clinton’s Council of Social Agencies.

‘80
Diane (Van Peursem) Broek, Sioux Center, is in her 25th year at Trans Ova Genetics, a bovine embryo transfer company. As the senior embryologist, she spends most of her time developing new centers around the country.

Brian Cottrell has worked as an information technology specialist at the Iowa Department of Transportation in Ames since 1986. His wife, Cathy (Cosgrove), has served as an adult circulation librarian in Boone since 1983. They recently celebrated their 25th wedding anniversary.

David Menning, Bloomington, Ill., serves as the director of property casualty countrywide pricing at State Farm Insurance.

The Rev. Edward Schreur is a Reformed Church in America pastor in Brookings, S.D. He previously served in New York City and Syracuse, N.Y. Soon he will be moving to Muscat, Oman, to be an RCA missionary with the Protestant Church of Oman.

Carol Van Brocklin is a school librarian for missionary families in the Philippines.

‘82
The Rev. LeRoy Boender is the pastor of Chancellor (S.D.) Reformed Church.

Roy Paul, Oceanside, Calif., was recently awarded the Bronze Star for his service in Iraq.

‘83
Marliss (Piekema) Katsma was recently named principal of Coulee Regional Christian School in West Salem, Wis.

Members of the class of 1965 gathering at Homecoming included: (front row, left to right) Jan (Edwards) Korver, David Korver, Bev Dowma, Les Dowma, Noreen (De Jager) De Hoogh, Ted De Hoogh ’68; (second row) John Buysman, Marilyn (Docter) Van Engelenhoven, Dave Van Engelenhoven, Bonnie (Vis) Meier, Lee Meier; (back row) Marilyn Draayer, Arian Draayer, Jean (Pulsma ’68) Foreman, Leland Foreman, Marvin Boelman.

Members of the class of 1980 gathering at Homecoming included: (front row, left to right) Brian Cottrell, Cathy (Cosgrove) Cottrell, Cathy (Hoogeveen) Graves, Bob De Young, Janet (Robkind ’82) Boote, Kevin Boote; (second row) Gracia (Moret) Gillespie, Brenda (Van Gorp) Schiaqut, Mary Beth (Lenderink) Reuvers, Dave Reinders, Mary Lu (Albertsen) Mauritz, Stan Mauritz, Brian Voss; (third row) Colleen (Korver) Richer, Ruth (Broek) Macchia, Rachel Klay, Diane (Van Peursem) Brook, Lois (Koele) Grant, Bev (Bahrke) Christiansen, Clyde Christiansen.
Prayer corner

In the wake of hurricanes, earthquakes, the continuing war in Iraq and the challenges of world hunger, many students are asking the question, “With all the places in the world where God could use me for service, what am I doing here?”

C.S. Lewis asked a similar question almost 60 years ago in an address which is published in his book, *Weight of Glory*. He wonders why one would study while there is a war going on. His answer is important.

He writes:

“If all the world were Christian, it might not matter if all the world were uneducated. But as it is, a cultural life will exist outside the church whether it exists inside or not … Good philosophy must exist, if for no other reason, because bad philosophy needs to be answered …

Most of all, perhaps, we need intimate knowledge of the past. Not that the past has any magic about it, but because we cannot study the future, and yet need something to set against the present, to remind us that the basic assumptions have been quite different in different periods and that much which seems certain to the uneducated is merely temporary fashion. The learned life then is, for some, a duty.”

God has called a group of students to prepare for service in God’s kingdom by working toward a quality education. It takes diligence, patience and a calling. Join us in a prayer for students whose duty is to study.

God of wisdom, we pray for the work of Northwestern College. Inspire its mission in Christ’s name and all who live within it by the power of the Holy Spirit. Call its students to serve when you have prepared them. By your grace, prosper every effort. Amen.

Nancy (Froehle) Wissink and her husband, the Rev. Paul, recently moved to Newton, Kan., where Nancy is a special education teacher at Newton High School and Paul is serving at St. Luke Presbyterian Church.

The Rev. Harlan VanOort ’82 Chaplain

Searches are open for the following positions:

Alumna to celebrate 100th birthday

by Duane Beeson

Elsie (De Vries ’23) Rosdail will turn 100 on Jan. 28, but she’s not sure if she’s going to celebrate as much as she did last year.

“I had three birthday celebrations for my 99th,” says the resident of Colonial Manor in Amana, Iowa. “I realized I was really getting old.”

While she’s lived long enough to be Northwestern’s oldest alum and is confined to a wheelchair, Rosdail is an avid reader who enjoys keeping up with current events. She regularly watches CNN—and reads the Classic cover-to-cover.

The salutatorian of her academy class, she says she liked all of her courses except math. “I wasn’t particularly fond of it. My teacher told our class it wouldn’t do us much good to have another year of math because we still wouldn’t get it.”

A native of Maurice, Rosdail paid a quarter to ride in a Milwaukee Railroad caboose back to campus after weekends at home. She taught for three years after graduation and then worked as a nurse in several cities in Iowa and Ohio. She and her husband, Glenn, farmed near Norway, Iowa. He died in 1979. Their two sons, Tom, 66, and Dan, 60, live in rural Amana.

Rebecca Schreuder teaches kindergarten at a bilingual school in Mexico City, where she has lived for four years with her husband, Rogelio Gomez.

Ryan Stander is an admissions counselor at North American Baptist Seminary in Sioux Falls.

Londa (Wassink) Dirksen teaches third grade at Robert Frost Elementary in Sioux Falls.

Brenda (Van Manen) Krueger recently graduated with a doctorate in chemistry from the University of Iowa.

Amy (Harder) Schumann is teaching Spanish part time at Grand View College in Des Moines.

Josh Thomas is a professor of human performance and wellness at Trinity International University in Deerfield, Ill.

Christal (Smith) Fendley, Bettendorf, Iowa, recently left her job as a teacher at the Putnam Museum and IMAX theatre to stay home with her daughter. She continues to teach piano lessons.

The Rev. Jolene Knudson-Hanse, Hoople, N.D., is serving Zion and South Trinity Lutheran churches. Her husband, James, is a carpenter.

Benjamin Lacey graduated from medical school at the University of Iowa. He and his wife, Katie, recently moved to Seattle, where he is beginning an internship at Virginia Mason Medical Center. He will then be in residency in physical medicine and rehabilitation at the University of Washington.

Nathan Lamb recently graduated from Union Theological Seminary in Richmond, Va., with a Master of Divinity and a Master of Arts in counseling. He now serves as associate pastor for Christian education at Grace Presbyterian Church in Spring Hill, Fla.

Levi Markwardt is a personal trainer at Sports Acceleration Center in Milford, Iowa.

Amber (Wissink) Minard, Onalaska, Wis., is pursuing a degree in geography from the University of Wisconsin-La Crosse.

After teaching in California for four years, Jennifer Neuhouser moved back to South Dakota, where she works for the Department of Education in Pierre. She also is pursuing a doctorate from the University of South Dakota.

Donny Strand and his wife, Jessica (Wilcox), recently moved to Puyallup, Wash., after both earning master’s degrees from George Fox University. Donny, who studied music education, opened a private practice in Tacoma. Jessica received her degree in education and now teaches third grade at Carter Lake Elementary.

Abby (Schuiteman) De Zeeuw is in her fifth year as a certified public accountant with Cain, Ellsworth and Co. in Sheldon, Iowa. She provides accounting, auditing and tax services. Her husband, Stan, teaches business education and serves as an assistant high school wrestling coach in Rock Valley.

Heidi (Hopkins) Rozenboom, Pella, Iowa, is a stay-at-home mom for her three children and is home-schooling the oldest child. She also does the bookwork for her husband’s business, VanderBeek Truck Accessories.

Chris Anderson recently moved to Austin, Minn., where he is the assistant general manager at Holiday Inn.

Maria DelBoer recently moved to Austin, Minn., where she stage-managed Noises Off for a new professional theatre company this fall.

Alissa Dornink will graduate in December with a master’s degree in library science from Texas Woman’s University. She is the assistant office manager for a general contracting company and a youth counselor at First United Methodist Church in Denton, Texas.

Kristen (Van Roekel) Dunlap, Cumming, Ga., works with various band programs and is an itinerant music teacher for Fulton County Schools. Her husband, Josiah ’01, works for IBM.

Dana Folkerts and his wife, Tonya (Neufeld ’03), recently moved to Des Moines after serving with Jackson County Ministries in Kentucky. Dana is a re-store coordinator for the Greater Des Moines Habitat for Humanity.
Bethany (Nikkel) Gaulke is now the communications leader at Third Reformed Church in Pella, Iowa. She is responsible for all church publications and for developing communications policy. Her husband, Brent, works for Pella Corp.

Jennifer Sowa is in her second year of a doctoral program in immunology at the University of Iowa, studying in a prostate cancer lab.

Rachel Van Den Broek was recently hired as an admissions counselor at Northwestern. Previously, she was on the library staff of Cornerstone University in Grand Rapids, Mich.

Brandon Van Marel recently returned to Northwestern after receiving a master’s degree in higher education from Geneva College in Pennsylvania. He serves as the resident director of Colenbrander Hall. His wife, Kelly (Huizenga ’02), is the theatre secretary and building manager of the DeWitt Theatre Arts Center.

Nick Waage graduated from the University of Iowa Dental School in June and has joined a dental practice in Milwaukee.

Julie (Ratz) Wondercheck serves as the children’s ministry director at Hope Community Church in Lincoln, Neb. Her husband, Jordan ’01, is working at State Farm Insurance in the total loss unit.

‘04

Grant Baker is a graphic designer and photographer for the Myers Group in Tucson, Ariz. His job includes aerial photography and publication design.

Jesica Borden is a consumer services specialist at The Homestead in Runnel, Iowa.

Mary Elizabeth (Sears) Breen teaches kindergarten and first grade at Sanborn (Iowa) Christian School.

Laura Keith is a defense and national security research assistant at The Heritage Foundation in Washington, D.C.

Emily Kooistra teaches second grade at Lynden (Wash.) Christian School.

Brooke Oehme, Pasadena, Calif., is in the Master of Divinity program at Fuller Seminary.

Laura Redig is working toward a Doctor of Osteopathy degree at Des Moines University.

Jaime Woudstra was recently hired in the accounts payable department at MEDTEC in Orange City. She played professional basketball in Iceland last year.

‘05

Casey Weaver is taking classes at Palmer College of Chiropractic in Davenport, Iowa.

New arrivals

Jon and Laura (Verdoorn ’91) Kroeze, son, Justin Lee, joins Caleb (4) and Joshua (2).

Patrick and Kristy (Kaster ’93) Connor, son, Dylan James, joins Mackenzie (5) and Benjamin (3).

Laura (Van Holland ’93) and Dave VanSteenwyk ’92, daughter by adoption from Guatemala, Maya Marlanee, joins Caleb (8) and Luke (5).

Pamela and Scott Dykstra ’95, daughter, Lilyan Joy, joins Drew (2).

Nancy and Brian Eveland ’95, daughter, Emily Jean, joins Luke (5).

Jennifer and Noel Scheaffer ’95, son, Micah, joins Graham (3) and Josiah (2).

Robert and Jacki (Kunkel ’95) Swidersberger, twins, Abby Maie and Jacob Rober, join stepsons Jesse (9) and Skyler (8).

2000 alumni gathering for their reunion at Homecoming were: (front row, left to right) Brian Kading, Dan Milczski ’02, Laurel (Sandhule) Milczski, Gena (Furth) Schmidt, Matt Schmidt, Carrie (Hoogenboom) Van Den Top, Stacie (Brosamle) Englin, Tony Englin ’99; (second row) Rebecca Hartbeke, Krista Meckling, Julie Wynia, Jennifer Neuhauer, Emily Gosselink, Jolene Knudson-Hanse, James Hanse, Amber (Wissink) Minard, Bob Minard; (third row) Scott de Boom, Karinda (Trumbule) de Boom, Janyce Valentine, Rachel (Sec) Valentine, Jamie Stadler, Mandy Green, Kim (Verburg) Peterson, Dan Peterson; (fourth row) Nichole (South) Will, Daren Will, Danielle Folkers, Jeremy Folkers, Heather (Van Kalsbeek ’01) Jackson, Jason Jackson, Kelly Van Haafken, Nikki (Tjossen) Zylstra.

Rob and Abbie (Vis ’96) Ruisch, son, Nathan Robert, joins Rachel (3).

Sherri (Van Roekel ’96) and Daron Van Beck ’97, son, Brendon Henry, joins Carson (4).

Kurt and Jennifer (Simm ’96) Van Noord, son, Isaiah Glenn, joins Blaze (1).

Michelle (Ringnald ’98) and Mark Andersen ’98, son, Micah James, joins Ezra (5) and Benjamin (3).

Patrick and Sarah (Huizenga ’98) Kinne, daughter, Hannah Eloise.

Angie (Smit ’99) and John Peterson ’00, daughter, Sydney Marie.

Julie (Main ’98) and Scott Petty ’96, son by adoption, Caden Grant.

Jonathan and Jennifer (Hubers ’99) Bente, daughter, Hannah Lea.

Marty and Rebecca (Berentschot ’99) Griffin, twin daughter and son, Emerson Lee and Jackson Phil, join Isabel (2).

Brenda (Van Manen ’99) and Brian Krueger ’96, son, Luke Brian, joins Amanda (1).

Amy and Josh Pyle ’99, daughter, Hannah Faith, joins Zachary (9).

Jeff and Amy (Harder ’99) Schumann, son, Logan Anthony, joins Mia (2).

Melissa and Dan Armagost Jr. ’00, daughter, Mackenzie Sue.

Stacie (Brosamle ’00) and Tony
Foss reaches for the sky

by Carrie Odell Anderson ’01

Matt Foss ’01 isn’t a household name yet, but he is getting noticed in Chicago, particularly by motorists who see him being robbed by cowboy mannequins on Western Union billboard ads throughout the Windy City. “The story’s pretty boring. I got paid $600 to stand there for an hour making faces,” says Foss, who discovered the designer added an airbrushed mustache to his mug.

Despite that paycheck, Foss is a self-described “poor actor in the city.” Every morning, he wakes up early, catches a ride to work, and delivers luxury cars until 5 p.m. Then he heads to rehearsal from 6:30 to 11 for the American Theatre Company’s production of It’s a Wonderful Life: a Live Radio Play, which runs for the month of December, before returning home for a few hours of sleep.

Foss, who has lived in Chicago since 2002, earned a Master of Fine Arts degree in theatre performance at the Theatre Conservatory of the Chicago College of Performing Arts at Roosevelt University. In addition to his roles with the American Theatre Company, he has also been involved in Chicago Shakespeare.

For the past three summers, Foss has traveled with Montana Shakespeare in the Parks, a troupe of about a dozen young actors who journey west to perform classic plays for a packed schedule of rural audiences. Foss’s roles have included Grumio in The Taming of the Shrew and Cleante in Tartuffe. Of the unique program, Foss says, “It is the acting job with the most integrity and altruism since I toured with Jeff Barker and the NWC theatre department.”

Meanwhile, Foss keeps his eyes open for other acting jobs in Chicago—and for outlaw mannequins in cowboy boots.

Englin ’99, son, Tyler James, joins Brandon (2).
Craigm and Christal (Smith ’00)
Fendley, daughter, Valanne Lynn.
Bob and Amber (Wissink ’00)
Minard, daughter, Malana Renee.
Gena (Führ ’00) and Matt Schmidt ’00, son, Gage Matthew, joins Gabrielle (2).
Betsie (De Boom ’00) and Scott Swartz ’99, son, Paul Andrew.
Karen (Van Zanten ’00) and Matt Westenberg ’00, daughter, Emily Joy, joins Kaitlyn (2).
Heather (De Vos ’00) and Colin Youde ’02, daughter, Mykin Rae.
Lisa (Lubbers ’01) and Jess Meekma ’00, daughter, Sophie Anne.
Kristi and Dan Robinson ’01, son, Noah Joseph, joins Ben (2).
David and Abi (Seymour ’01) Van Regenmorter, son, Trace David, joins Blake (2).
Dave and Sara (Fuoss ’02) Jansma, daughter, Breanna Noelle.
Tonya (Neufeld ’03) and Dana Peterson ’02, son, Drew Isaac.
Penny (De Haan ’03) and Chris Rott ’01, son, Logan Christopher.
Michael and Jamie (Zeutenhorst ’04) Kamerman, daughter, Jaylee Beth.
Molly and Tim Truesdell ’04, son, Micah John.

Marriages
Mike Takalo ’96 and Rena Kraut, Minneapolis.
Ryan Stander ’98 and Karina Breitkreuz, Sioux Falls.
Erin Peters ’99 and Rob Wilkens, Johnston, Iowa.
Josh Thomas ’99 and Jeanne Boutott, Arlington Heights, Ill.
Lmanda Wassink ’99 and Kirk Dirlsken, Sioux Falls.
Shelley Beal ’00 and Ben Twigg, Waukee, Iowa.
Breanne Albers ’01 and Patrick Van Gelder, Alton, Iowa.
Josiah Dunlap ’01 and Kristen Van Rockel ’02, Cumming, Ga.
Travis Schnellner ’01 and Carrie Lamm, Cherokee, Iowa.
Alison Van Nijuis ’01 and Dean Swindf, Jacksonville, Fla.
Dan Dobbs ’02 and Heather Hoffeld, Omaha.
Gina Spoelstra ’02 and Wayne Ohnesorg, Ames, Iowa.
Nick Waage ’02 and Danielle Williams, Milwaukee.
Amber Bolkema ’03 and Tomas Holberg, Sioux Falls.
Michael Pulcher ’03 and Ethanie Wallinga ’04, Sioux Falls.
Erica Smith ’03 and Matthew Johnson, Sioux Falls.
Rebecca Vander Selt ’03 and Andrew Rischedahl, Ireton, Iowa.
Rebecca Voss ’04 and Nate Rall, South Holland, Ill.
Ashley DeLover ’05 and Ryan Rull, Houston.
Jenny De Vries ’05 and Casey Weerheim ’05, Davenport, Iowa.
Kristina Johnson ’05 and Jeff Postma ’05, Indianapolis.
Jolynne Nelson ’05 and Brett Eltis, Spencer, Iowa.
The couples reside in the city listed.
An Irreplaceable Loss

by Dr. Joonna Smitherman Trapp

In the aftermath of Katrina, the focus has been, and rightly so, on the victims of the hurricane—the displaced, the injured, the dead. Organizations such as the International Committee of the Blue Shield (ICBS) have recently issued statements calling for attention, at the appropriate time, to the cultural heritage of New Orleans and the surrounding areas.

“A community,” they say, “cannot function effectively in the larger societal context if deprived of its identity through the loss of cultural heritage.”

In my frantic searches on the Internet for news, I have discovered pictures of archival storage units that house important letters, deeds, speeches and pictures of Southern history. The boxes in the archives are sometimes intact, sometimes not—but all are damaged, and the ink on the pages in the boxes is in terrible shape.

Dan Daily, director of Northwestern’s Ramaker Library, tells me that records floating in flood waters are often salvageable if still in their containers, but the recovery is a long process—and expensive. The damage at some archives is so prevalent that libraries have had to decide which boxes to put in cold storage for later restoration. The remaining records are just left to deteriorate.

When I see these pictures, I try not to be furious with myself for delaying the visit I had planned to make to the New Orleans archives last summer. Popular oratory in the New Orleans area before the Civil War is very important to me, and in my search to build the lyceum in the antebellum South. English professor Joonna Trapp is on sabbatical this year in Orange City, working on her book on the lyceum in the antebellum South. As part of that project, she traveled extensively in the South last summer with funds from Northwestern’s Competitive Summer Research Grant. She says she is enjoying being only a scholar this year, but she can’t quite distance herself from interaction with colleagues and students at the college.

Politics are a way to help people from a governmental standpoint. As a political science and economics major, I spend a lot of time thinking about political issues in class. This influences the way I fulfill my roles as a local city councilman, vice president of the Student Government Association and vice chair of the College Republicans. These positions, along with my internship in Washington, D.C., have given me real-world experience. Both classroom lessons and hands-on experiences are necessary for a well-rounded education. Neither is sufficient by itself. Your donation to the Northwestern Fund helps provide opportunities for students to put our classroom knowledge into action.

Contact Jennie Smith, director of the Northwestern Fund, to find out how you can help Northwestern students maximize their education through real-life experiences.
